The screenshot shows the JIRA Administration interface. The top navigation bar includes 'Dashboards', 'CURVC Boards', 'Projects', 'Issues', 'Boards', 'Plans', 'Log List', 'BigPicture', and a 'Create' button. The 'Administration' section is active, with a search bar and tabs for 'Applications', 'Projects', 'Issues', 'Manage apps', 'User management', 'Latest upgrade report', and 'System'. The 'System' tab is selected, showing a sidebar with various system support options like 'General configuration', 'Find more admin tools', 'Jira mobile app', 'SYSTEM SUPPORT', 'System info', 'Instrumentation', 'JMX Monitoring', 'Database monitoring', 'Integrity checker', 'Logging and profiling', 'Scheduler details', 'Troubleshooting and support tools', and 'Audit Log'. The main content area is titled 'Backup Jira data' and contains instructions: 'This will backup the contents of the database in a portable XML format. You can use this backup to move Jira between different databases if required, as well as creating a backup that you can use if something goes wrong. To backup The backup file will be placed here: /app/atlassian/application-data/jira-home/export'. A yellow warning box states: 'Attachments will not be backed up. This needs to be done manually. XML generation is complex so there might be a delay before it completes!'. Below this is a 'File name' input field and 'Backup' and 'Cancel' buttons.
