Scriptrunner 활용하여 이슈에 댓글 남길 시 자동 제한 설정

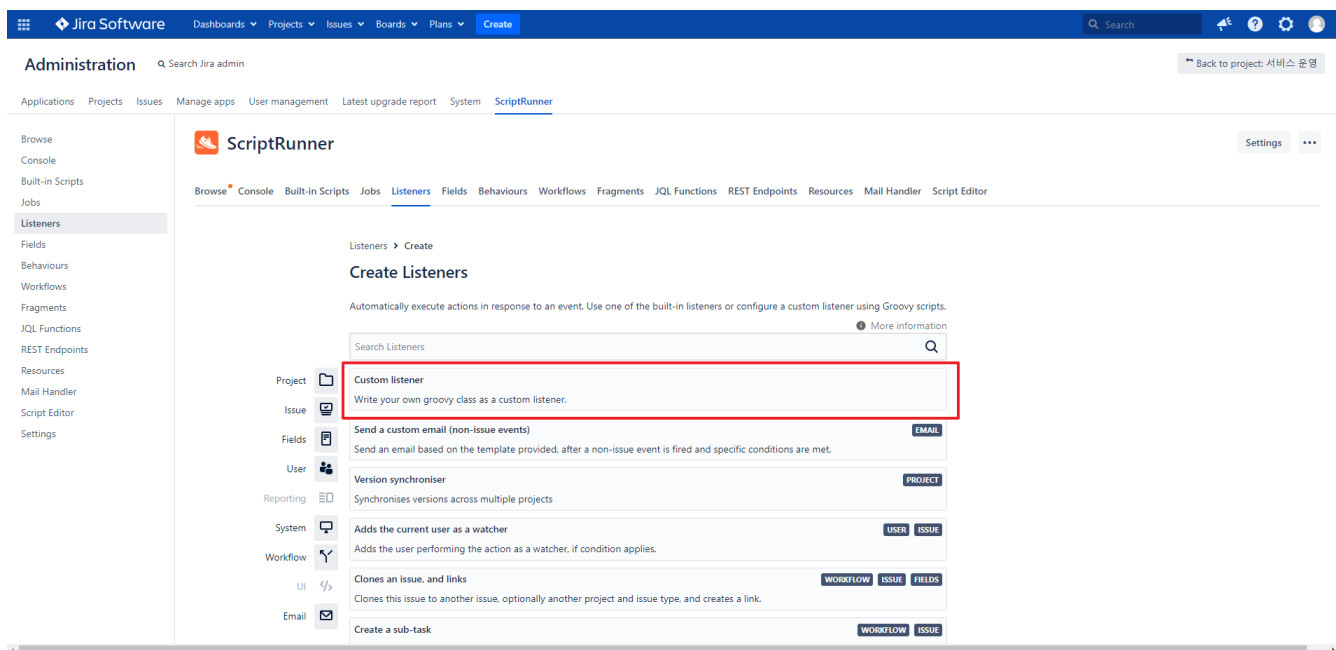

Scriptrunner Listener 만들기

- Scriptrunner → Listeners → Create Listener 선택

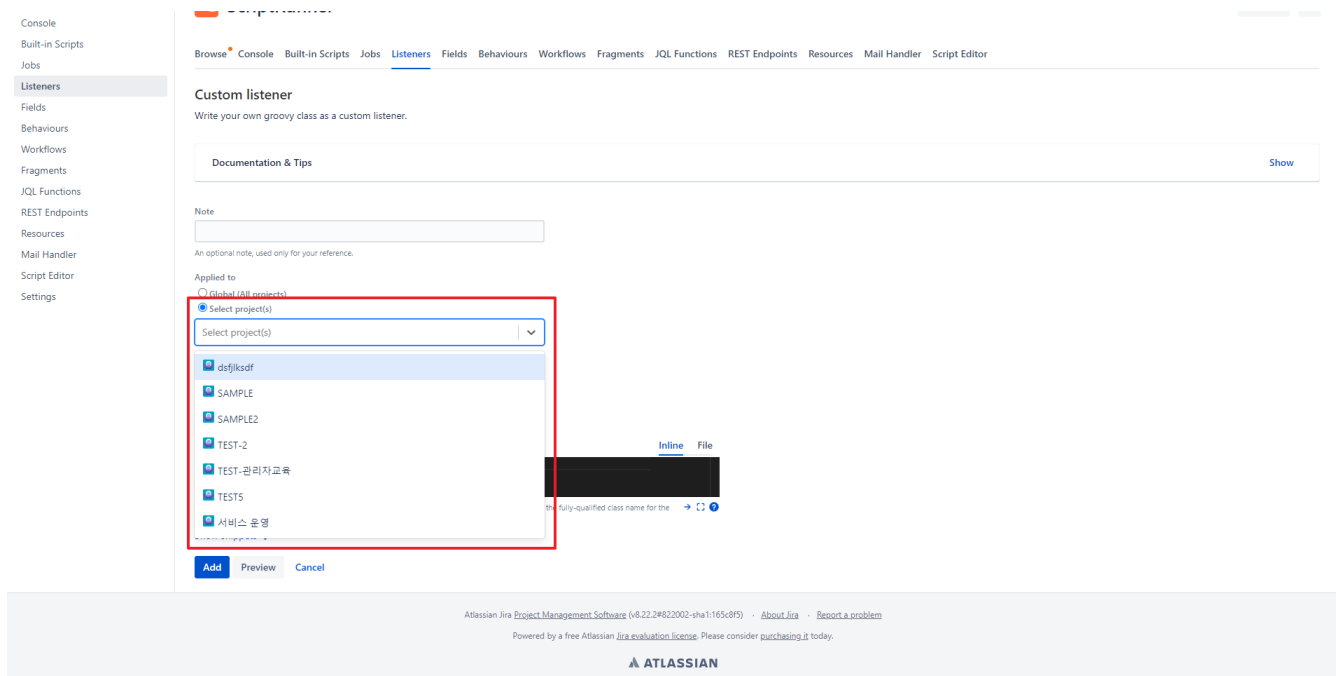

The screenshot shows the Jira Administration interface. The 'ScriptRunner' tab is selected and highlighted with a red box. Below it, the 'Listeners' section is visible. A table lists existing listeners, and a 'Create Listener' button is highlighted with a red box and a blue circle labeled '2'.

Name	Applied to	Events	Performance	History	Actions
Custom listener	SERVICE	2 Events	1s	All of the last 15 executions have failed	...
Custom listener	SERVICE	1 Event	1s	No failures in the last 1 execution(s)	...

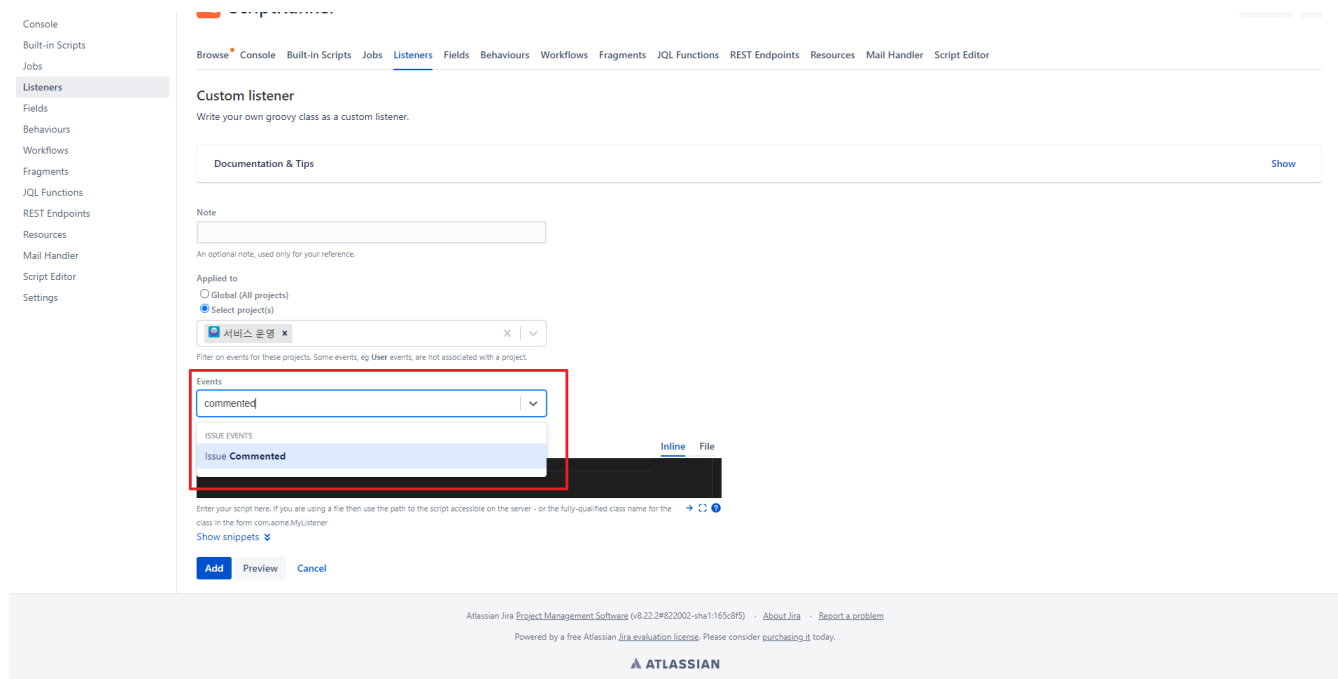

- Custom Listener 선택

적용할 프로젝트 선택

Issue Commented 선택

- 스크립트
8번줄에 적용할 역할 ID값 입력

```
import com.atlassian.jira.component.ComponentAccessor
import com.atlassian.jira.issue.comments.MutableComment
import com.atlassian.jira.event.issue.IssueEvent

def event = event as IssueEvent
def user = event.getUser()
def comment = event.getComment() as MutableComment
comment.setRoleId(10202)
ComponentAccessor.getCommentManager().update(comment, true)
```

- 그룹으로 제한을 걸 경우: setGroupLevel(그룹명) 사용
단 제한에서 보이는 그룹명으로 설정

Note

An optional note, used only for your reference.

Applied to

☐ Global (All projects)

☒ Select project(s)

서비스 운영 x

Filter on events for these projects. Some events, eg User events, are not associated with a project.

Events

Issue Commented x

Which events to fire on.

Script

```
1 import com.atlassian.jira.issue.eventtypes.IssueEvent
2 import com.atlassian.jira.issue.eventtypes.IssueEventTypes
3 import com.atlassian.jira.issue.eventtypes.IssueEventTypes
4 import com.atlassian.jira.issue.eventtypes.IssueEventTypes
5 import com.atlassian.jira.issue.eventtypes.IssueEventTypes
6 def event = event
7 def user = user
8 def comment = comment
9 comment.set
10 ComponentAccessor.getCommentManager().update(comment, true)
```

Enter your script here. If you are using a file then use the path to the script accessible on the server - or the fully-qualified class name for the class in the form com.acme.MyListener

Project Role Browser

You can use project roles to associate users and/or groups with specific projects. The table below shows all the project roles that are available in Jira. Use this screen to add, edit and delete project roles. You can also click 'View Usage' to see which projects, permission schemes and notification schemes are using project roles.

Project Role Name	Description	Actions
Administrators	A project role that represents administrators in a project	View Usage Manage Default Members Delete Edit
Developers		View Usage Manage Default Members Delete Edit
Tempo Project Managers	This role grants users access to view all worklogs within a particular project. Deleting this role will prevent Tempo Project Managers from viewing worklogs accessed through the "Tempo Project Managers" role. This action cannot be undone.	View Usage Manage Default Members Delete Edit
Testers	A project role that represents testers in a project	View Usage Manage Default Members Delete Edit
니개발리더		View Usage Manage Default Members Delete Edit
개발팀		View Usage Manage Default Members Delete Edit
개발팀 리더		View Usage Manage Default Members Delete Edit
기획팀		View Usage Manage Default Members Delete Edit
기획팀 리더		View Usage Manage Default Members Delete Edit
디자인(리더)		View Usage Manage Default Members Delete Edit
디자인운영리더		View Usage Manage Default Members Delete Edit

SHARED ITEMS Filters Dashboards

ADVANCED Indexing Replication Content Delivery Network Attachments Events

Sharing with anyone on the web ☐ ON ☒ OFF
Allows users to share dashboards and filters with anyone on the web (including users who are not logged in). Disabling this will not affect dashboards and filters that are already shared with anyone on the web. You'll need to update them manually. [Learn more](#)

Maximum project name size
The minimum length is 2. 80 is recommended. Changing this length will not impact the currently existing project names.

Maximum project key size
The minimum length is 2. 10 is recommended. Changing this length will not impact the currently existing project keys.

Allow unassigned issues ☐ ON ☒ OFF
Cannot turn off "Allow unassigned issues" as there are 67 issue(s) that are unassigned.
Please assign these issues before disabling Unassigned issues.
N.B. You may not have permissions to view all of these issues.
Cannot turn off "Allow unassigned issues" as there are 7 project(s) that have Default assignees set to "Unassigned".
Please edit these projects before disabling Unassigned issues.

External user management ☐ ON ☒ OFF
Indicates that you are using user management from outside Jira. Jira will not display options for users to change their password, or edit their profile.
Note: With the 'authentication only' LDAP provider, this should be left **off**, as accounts are stored locally.

Logout confirmation ☒ Never ☐ Cookie ☐ Always
Whether to obtain user's confirmation when logging out. 'cookie' means prompt for confirmation if the user was automatically logged in (via a cookie). Default is 'never'.

Use gzip compression ☒ ON ☐ OFF
Whether to compress the web pages that Jira sends to the browser. It is recommended that this be turned ON, unless you are using mod_proxy.

User email visibility ☒ Public ☐ Hidden ☐ Masked (i.e. user at example dot com) ☐ Show to logged in users only
Indicates who can view user email on the user profile page

Comment visibility ☒ **Groups & Project Roles** ☐ Project Roles only
enables/overrides comment and worklog visibility based on groups and project roles.

Exclude email header "Precedence: bulk" ☐ ON ☒ OFF
Whether to exclude the 'Precedence: bulk' header on Jira notification emails. Only turn this on when notifications go to a mailing list which rejects 'bulk' mails.
In normal circumstances, this header prevents auto-replies (and hence potential mail loops).

Issue Picker Auto-complete ☒ ON ☐ OFF
Enables auto-complete and searching of issues from within the issue pickers

JQL Auto-complete ☒ ON ☐ OFF
Enables auto-complete for entering JQL queries in the advanced issue navigator

Internet Explorer MIME Sniffing ☐ Insecure: inline display of attachments ☒ Secure: forced download of attachments for all browsers
Policy
☒ Work around Internet Explorer security hole
Attachment viewing security options for cross-site scripting vulnerabilities present in Internet Explorer 7 and earlier: Use the workaround to reduce the risk of attacks to IE users via attachments. Use download-only mode to sacrifice attachment viewing convenience in all browsers and gain ultimate protection against hostile attachments. See [JIRA Security Advisory 2008-08-26](#).

Contact Administrators Form ☐ ON ☒ OFF
Enables users to contact administrators by displaying an email form. Can be used with or without the custom message below.
To send email you need to configure a mail server.

Contact Administrators Message
