

Elasticsearch 가 pack 오류로 시작하지 않을 때 조치 방법

Bitbucket Datacenter 구성시 Elasticsearch를 외부에 설치해야 한다. 그리고 Elasticsearch에 Buckler라는 plugin 설치 후 다음과 같은 원인으로 elasticsearch가
 기동하지 않을 때의 조치 방법

오류 메시지:

```
[2019-11-05T06:30:29,908][DEBUG][o.e.a.ActionModule      ] [i7kudWM] Using REST wrapper from plugin org.
elasticsearch.xpack.security.Security

```

Try disabling xpack security features (it's stuff that readonlyrest offers anyway) from elasticsearch.yml

```
xpack.security.enabled:false
```
