

1.1.5

Maintenance Release

Bugfix and supports Jira 8.14.1. Compatibility check is completed.

In the meantime, many customers have inquired about the schedule of deploying add-on for DC. We are developing for DC compatibility with the goal of publishing the app at the end of May 2021.

Once the app for DC is published, you can continue to use the app by purchasing the Project Budget Add-on for the Jira Datacenter.

We will strive to provide better project management capabilities in Project Budget add-on.
